- Overwhelming Complexity
- Difficulty options
- Bad translations

## Criteria

- Language Options
- Accessibility
- Multiplayer

## Biography

Mia Rodriguez, a 28-year-old software engineer living in sunny Austin, Texas. By day, she's a software developer, but when she's off the clock, she spends time with her family.

Mia's passion for gaming goes beyond the thrill of competition; it's a way for her to bond with her younger sibling. There's just one catch: her sibling primarily speaks Spanish, while Mia is fluent in both Spanish and English. This language barrier has sometimes stood in the way of their gaming adventures.

Mia's gaming frustrations have led her on a quest to find games that not only offer exciting gameplay but also bridge the language gap, allowing her and her sibling to fully enjoy gaming together. She seeks titles that provide multilingual support, boast accessibility for newcomers, and spare her the constant pestering of in-app purchases. She wants to showcase the power of multilingual gaming, bringing joy and connection to her family gaming sessions.
